**Uses**

Powdery mildew control in wheat, barley, oats, rye, triticale, grapevines, stone fruit, cucurbits, peppers, chilies, hops, strawberries, pome fruit, mango, field peas.

**Resistance Status**

- Resistance known to these molecules in *Erysiphe necator* and *Blumeria graminis*.
- Medium risk.
- Resistance management required.
- Cross resistance seen between the 2 actives in *Erysiphe necator*.
- Active resistance monitoring program for *Erysiphe necator* and *Blumeria graminis*

**Resistance Mechanism**

- Unknown

**Recommendations**

**Recommendations for cereals**

- Apply Group 13 fungicides preventatively.
- Apply a maximum of 2 Group 13 fungicides containing sprays per crop solo or in mixture (co-formulations or tank mixes) with effective mixture partners from different cross-resistance groups.
- If a second application is needed, it should be in tank-mix with an effective powdery mildewcide with another mode of action.
- Always follow product specific label recommendations for resistance management.

**Recommendations for grapes**

- Apply Group 13 fungicides preventatively.
- Group 13 fungicides must be applied in spray programs with fungicides of a different mode of action.
- Apply a maximum of 3 Group 13 fungicide containing sprays per season, solo or in mixture (co-formulations or tank mixes) with effective mixture partners from different cross-resistance groups.

- Do not exceed 2 consecutive applications of Group 13 fungicides per season.

**Recommendations for cucurbits, fruiting vegetables and strawberries**

- Apply Group 13 fungicides preventatively.

- Group 13 fungicides must be applied in spray programs with fungicides of a different mode of action.

- The number of sprays of group 13 fungicides per crop should not exceed 50% of the total number of powdery mildew sprays per season, solo or in mixture (co-formulations or tank mixes) with effective mixture partners from different cross-resistance groups.

Do not exceed 2 consecutive applications of Group 13 fungicides per season

Always follow product specific label recommendations for resistance management
